

SOLID Bifacial

Frameless _ Glass/Glass

60 cell

Self-cleaning effect

Extreme load resistance

Fire class A

Salt mist resistance

Ammonia resistance

Dust and sand resistance

Positive sorting up to +5W

Front side ⚡ 360 W

30 Year product warranty

87% Power guarantee

30 Year efficiency guarantee

SoliTek

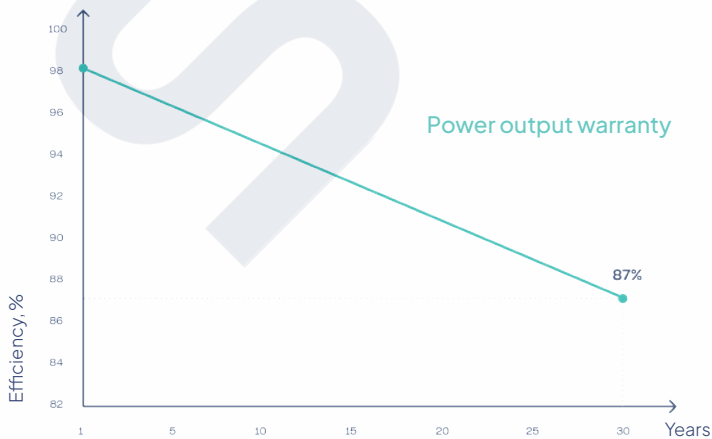

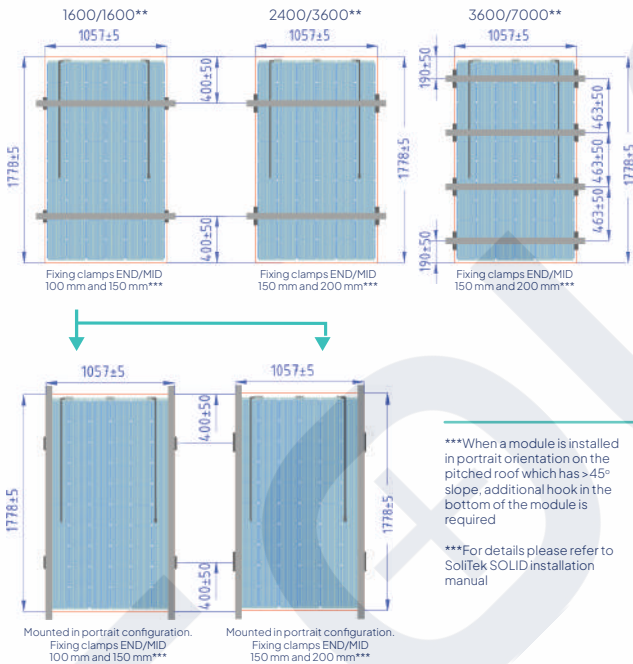

Rev. 20220801

Electrical data (STC*)	
Maximum power	360
Cell technology	Bifacial
Open circuit voltage (V_{oc}/V)	40,41
Short circuit current (I_{sc}/A)	11,09
Max power voltage (V_{mpp}/V)	34,44
Max power current (I_{mpp}/A)	10,48
Module efficiency (η)	19,38%
Max system voltage (V)	1500
Max current (A)	15
Power tolerance	0/+5W

*Under standard test conditions (STC) of irradiance of 1000W/sq.m., spectrum AM1.5 and cell temperature of 25°C. Flash testing measurement accuracy of +/-5%. All transparency values are approximate +/-3%.

Additional power gain	5%	10%	20%	25%
Total module power (Wp)	378	396	432	450

Dimensions & Mounting

Temperature ratings

Current temperature coefficient (α)	+0.04% / °C
Voltage temperature coefficient (β)	-0.35% / °C
Power temperature coefficient (δ)	-0.47% / °C
Nominal operating module temperature	46 °C

Mechanical data

Dimensions (LxWxH) (mm)	1770x1049x7,1
Dimensions with edge sealing (LxWxH) (mm)	1778±5x1057±5x7,1
Weight (kg)	30
Front / Back glass (mm)	3
Cell Type	Bifacial
Cell Size (mm)	166x166
Busbars	9
Transparency %	10
Cell configuration	6x10
Frame	Frameless
Operating temperature (°C)	-40 ÷ +85
Design load (wind/snow) (Pa)	3600/7000**
Maximum test load (wind/snow) (Pa)	5400/10500
Junction box / IP class	Split junction box / IP68
Cable cross section size (mm ²)	4
Cable length	1,2 m
Bypass diodes	3
Connector	MC4 compatible

**Safety factor 1.5

Attention

- Always check if your system is compatible with local environmental conditions (wind / snow load, temperatures) on your site to ensure safety and long-term energy production.
- Do not connect differently orientated PV panels in the same string / MPPT of the inverter (unless optimizers are used).
- Do not connect strings with an unequal amount of PV panels in one MPPT (unless optimizers are used).
- Use PV panels of same electrical parameters in one string/MPPT (unless optimizers are used).
- Always ensure that your inverter is equipped with DC disconnecter. If not it is recommended to install it externally.
- Never let different metals come in contact with each other. Use bi-metallic plates or plastic separators to eliminate galvanic corrosion.
- It is highly recommended to install SPD's in both AC and DC circuits because overvoltages void the warranty for inverters and also panels if they are harmed.
- It is highly recommended to ground PV panels mounting system and to install lightning protection in site.
- If the mounting rails are installed across the module, bifaciality effect will be lower due to cells shading.

Tips for better power output

- Better module ventilation and shorter connection cables increase electrical energy production.
- Always observe object/mutual shading in site. Shading can drastically cut electrical energy generation output.
- Increase PV panel height from the ground so that more light can travel beneath the module and then reflect.
- The Albedo value increases significantly if the modules are installed above white, lightreflecting surfaces.
